Shift Work Principles

Principles underpinning all aspects of shift work are included for the first time in the PSA's proposed new Enterprise Agreement.

The increasing requirement for flexibility in operational hours - particularly in Health areas - demand clauses which deliver clarity and protections for all members affected by shift work arrangements.

One key principle of the PSA's shift work proposals is the requirement for agreement around establishing and changing rosters.

The PSA's proposals also provide clarity on the accrual of the additional annual leave entitlement for those employees working across seven days per week.

Stronger protections for members affected by shift work arrangements is just one of many improvements for members in the PSA's proposed new Enterprise Agreement.

The full PSA Draft Salaried Enterprise Agreement and an overview are available to download from the PSA website:
